## **TEACHING PLAN**

**BA Honours (Major/ Minor) under FYUGP Programme**

**English Core, Paper: ENGLISH: Literary and Social History, Total Credit: 4**

### **Course Objectives:**

1. To acquaint the students with the basic concepts of English literary and social history.
2. It intends to familiarize the students with the socio-cultural and historical background of English literature.
3. By adopting a chronological approach to the study of poetry, drama, fiction and non-fictional prose, it shows the development of each form as it moves through the various periods of English literature and its expansion into global English writing.

### **Learning Outcome:**

This paper on English Literary and Social history aims to enable students to acquaint themselves with literary and cultural institutions to understand the context of literature engaged with social and political realities that have impacted English literature. The students will learn the different trajectories of social and cultural movement to analyze the interconnection between text, context and influence. It will encourage situational moods of reading through an examination of social and cultural embeddedness in the context of English literature.

### **Teaching Strategies/ Approaches/ Techniques:**

Since the institutional affiliation has a rural set up, therefore, teaching strategies should be in conjunction with their individual adaptability. Their exposure to L2 environment is very restricted as most of the students are from vernacular medium. So, switching back concurrently to other native languages like Assamese, Hindi, Bengali while communicating with them seems to be a situational necessity. Resultantly, the preferred method becomes deductive in place of being inductive. The teachers follow usual lecture method in the classroom as well as are compelled to adopt translational technique to deliver the content.

Teaching mechanism is completely regulated by the provided syllabus from the university and the paper is periodically segmented into different ages of development. So, to earn more feasibility in teaching and learning, different units are distributed to assigned teachers who divide the allotted content into separate core components on each unit on their part.

### Detailed Course Components:

- **Unit I: Medieval to the Renaissance (1 Credit)**

- Feudalism and the Medieval World
- Chaucer, Langland, Gower
- Medieval and Renaissance English theatre
- Elizabethan and metaphysical poetry
- The print Revolution

- **Unit II: The Enlightenment to the Nineteenth Century (1 Credit)**

- The scientific revolution and the enlightenment
- Restoration Drama
- Defoe and the rise of the novel
- The industrial revolution
